Full Stack Developer / IT Support Specialist / Graphic Designer

SUMMARY

Information Technology graduate and versatile creative professional with hands-on experience in full stack web development, IT support, and graphic design. Proficient in React.js, Laravel, PHP, JavaScript, MySQL, and Docker, with additional expertise in Adobe Photoshop and digital design for product manufacturing. Demonstrated ability to lead development projects end-to-end — from requirements gathering through deployment — while also delivering production-ready design assets for laser cutting, engraving, and promotional use. Adept at resolving hardware, software, and network issues in fast-paced environments, with a consistent track record of improving operational efficiency through technology and creative problem-solving.

EXPERIENCE

June 2026 – Present

Graphic Designer

Crissander Enterprises | Baclayon, Bohol, Philippines

- Create digital designs for customized woodcraft products, translating client ideas and concepts into detailed visual layouts ready for production.
- Prepare and optimize production-ready files for laser cutting and engraving machines, ensuring precision, correct dimensions, and proper file formatting.
- Design promotional materials including social media graphics, product catalogs, and marketing collateral to support brand visibility and sales.
- Assist with the retail presentation of products, including product arrangement, labeling, and visual merchandising to enhance customer appeal.
- Collaborate with the team to develop new product design concepts aligned with customer preferences and seasonal trends.

Dec 2025 – Apr 2026

Information Technology Support

Provincial Government of Bohol | Tagbilaran City, Bohol, Philippines

- Provided Tier 1-2 technical support for hardware, software, printers, and LAN/Wi-Fi connectivity issues, minimizing downtime.
- Configured workstations, peripherals, and presentation equipment to ensure smooth office operations and meetings.
- Organized, indexed, scanned, and digitized procurement records, improving document accessibility and retrieval.
- Coordinated procurement document routing and tracking, supporting efficient administrative workflows.
- Assisted with office relocation, workstation setup, and IT asset inventory to maintain operational continuity.
- Performed basic software installation, system maintenance, and administrative support to enhance daily office productivity.

EDUCATION

Aug 2022 – May 2026

Bachelor of Science in Information Technology

Holy Name University

SKILLS

Programming Languages: JavaScript (ES6+), PHP, Python, HTML5, CSS3

Frameworks, Libraries, & Tools: React.js, Laravel, Bootstrap, Tailwind CSS

Git, GitHub, Docker, Linux CLI, Windows Server

Graphic Design: Adobe Photoshop, digital design, promotional materials, production-ready file preparation

Productivity: Microsoft Office (Excel, Word), AI-assisted workflows, technical documentation

Problem-solving, attention to detail, time management, team collaboration, adaptability

PROJECTS

eReligiousServices Web-Based Reservation & Scheduling System

Tech Stack: Laravel, MySQL, Tailwind CSS, PHP, JavaScript

- Developed a full-stack web application for Holy Name University's Center for Religious Education and Mission (CREaM) to digitize liturgical service reservations and scheduling.
- Implemented role-based access control (RBAC), calendar scheduling, email notifications, and an in-app messaging feature to improve user experience.
- Designed and managed a normalized MySQL database to securely store and organize reservation, user, and event data.
- Gathered system requirements through stakeholder discussions and translated them into functional system features.
- Automated reservation and scheduling processes to reduce manual work and improve coordination between users and administrators.
- Developed an admin dashboard with reports and analytics to help monitor reservations and support operational decisions.
