PROJECTS

eReligiousServices

- Developed **eReligiousServices**, a web-based reservation and scheduling system for Holy Name University's Center for Religious Education and Mission (CREaM) to digitize and streamline liturgical service requests.
- Designed and implemented core features including centralized reservations, real-time calendar scheduling, priest assignment, automated notifications, secure chat, and role-based access control.
- Built the system using **Laravel, MySQL, and Tailwind CSS**, ensuring responsive design, database efficiency, and secure user management.
- Conducted requirement gathering through interviews and observations with staff and requestors to align system features with operational needs.
- Improved scheduling accuracy, reduced manual administrative workload, and enhanced communication through process automation.
- Generated reports and monitoring tools to support decision-making, transparency, and efficient service coordination.

Personal Portfolio

- Developed a personal portfolio website showcasing professional profile, offered services, technical skills, and selected projects.
- Designed a responsive and user-friendly interface to effectively present qualifications, experience, and project accomplishments.
- Highlighted technical expertise and core competencies to strengthen professional branding and online presence.
- Integrated project showcase sections to demonstrate practical experience, creativity, and development capabilities.
- Optimized website structure and navigation for improved accessibility and user engagement.
